BEHR PREMIUM PLUS® INTERIOR PAINTS

INTERIOR PAINTS

BEHR PREMIUM PLUS® - Interior is a GREENGUARD® Gold certified 100% acrylic, low odor paint and primer.

In order to support comparative assertions, this EPD meets all comparability requirements stated in ISO 14025:2006. However, such differences in certain assumptions, data quality, and variability between LCA data sets may still exist. As such, caution should be exercised when evaluating EPDs from different manufacturers, as the EPD results may not be entirely comparable. Any EPD comparison must be carried out at the building level per ISO 21930 guidelines. The results of this EPD reflect an average performance by the product and its actual impacts may vary on a case-to-case basis.

Behr Paint Company, home to Behr Process LLC and Masterchem Industries LLC, the makers of BEHR® and KILZ® Brands respectively, is one of the largest manufacturers and suppliers of paint, primers, stains and surface finish products to Do-it-Yourselfers and Professionals. Sustainability is the core concept of our business strategy and culture ensuring top economic, social and environmental performance. Behr Paint Company's commitment to sustainability, quality, value, and performance has driven our desire for innovation and transparency. The creation of a Life Cycle Assessment (LCA) report and Environmental Product Declarations (EPD) allows us to continually improve our operations and illustrate a complete story behind our products.

LIMITATIONS

Exclusions: EPDs do not indicate that any environmental or social performance benchmarks are met, and there may be impacts that they do not encompass. LCAs do not typically address the site-specific environmental impacts of raw material extraction, nor are they meant to assess human health toxicity. EPDs can complement but cannot replace tools and certifications that are designed to address these impacts and/or set performance thresholds – e.g. Type 1 certifications, health assessments and declarations, environmental impact assessments, etc.

Accuracy of Results: EPDs regularly rely on estimations of impacts; the level of accuracy in estimation of effect differs for any particular product line and reported impact.

Comparability: EPDs from different programs may not be comparable. Full conformance with a PCR allows EPD comparability only when all stages of a life cycle have been considered. However, variations and deviations are possible. Example of variations: Different LCA software and background LCI datasets may lead to differences results for upstream or downstream of the life cycle stages declared.

Premium Plus® Interior Paint

According to ISO 14025,
ISO 21930

1. Product Definition and Information

1.1. Description of Company/Organization

Founded in 1947, Behr Paint Company is one of the largest manufacturers of paints, primers, decorative finishes, stains, surface preparation and application products for do-it-yourselfers and professionals in the United States, Canada, and Mexico. The Santa Ana, Calif.-based company, and maker of the most trusted paint brand in America BEHR®, along with the KILZ® and WHIZZ® brands, are dedicated to meeting the project needs of DIYers, designers and professional paint contractors with an unwavering commitment to quality, innovation, and value.

1.2. Product Description

Product Identification

The Behr Premium Plus® Interior Paints are a GREENGUARD® Gold certified 100% acrylic, Paint & Primer that contain low VOC and provide exceptional value and durability. They seal both uncoated and previously painted surfaces to create a finish that resists mildew, stains, moisture and wear, and stands up to scrubbing. The Behr Premium Plus® Interior product line includes the following sheens: 1050 Flat, 2050 Eggshell, 3050 Satin, 7050 Semi-gloss, and High Gloss, and is available in half-pint, quart, gallon, two-gallon, and 5-gallon size containers. There are tint bases offered for all sheens in the series as follows: White, Medium, and Deep Bases that allow custom tinting to any desired color.

Product Specification

Behr Premium Plus® offers exceptional durability and hide with a finish that resists mildew and stains. In addition, you'll enjoy the benefits of a low odor paint. Premium Plus® is highly ranked by independent 3rd party labs and meets LEED and GREENGUARD® GOLD requirements. Premium Plus® Interior's foolproof formula is easy to apply, and its excellent hide ensures stress-free coverage, wall-to-wall. With superior stain-blocking & stain resisting benefits, your walls will endure whatever life throws their way. With advanced scrubability, it is easy to maintain the color and finish for years to come.

Flow Diagram

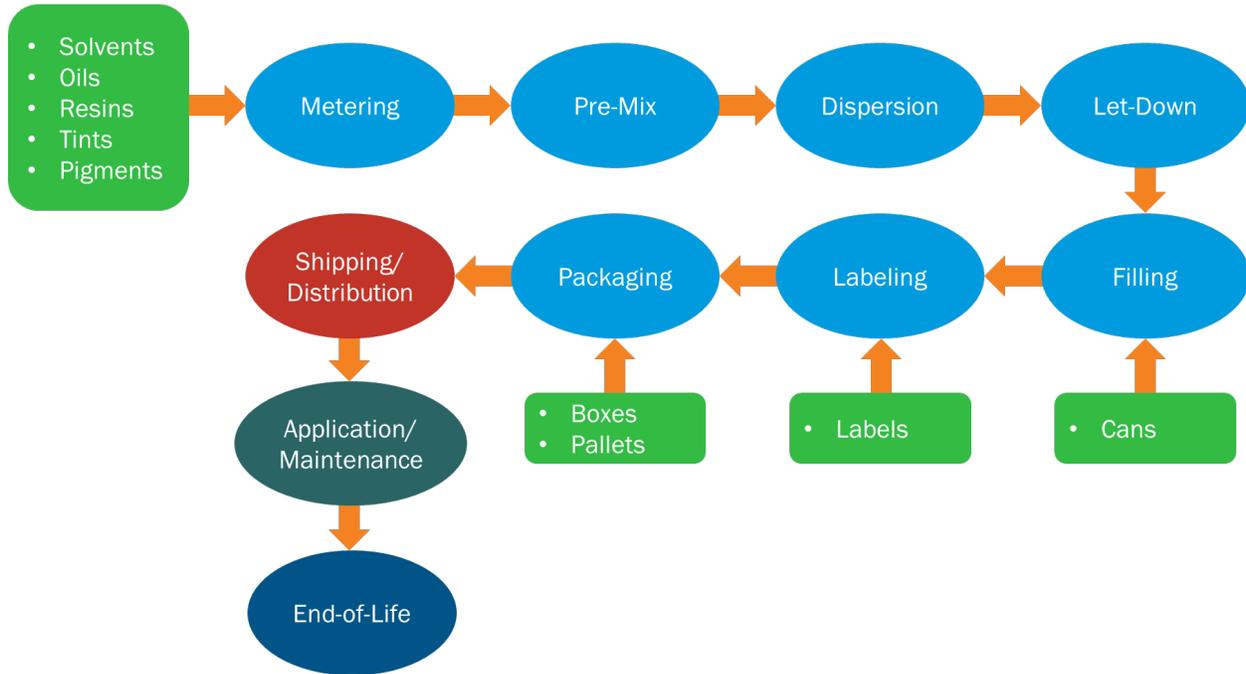

Figure 1. Flow diagram for cradle-to-grave LCA of Behr Premium Plus® Interior Paint.

1.3. Application

The Behr Premium Plus® Interior Paints are an acrylic, Paint & Primer that seal both uncoated and previously painted surfaces to create a finish that resists mildew, stains, moisture and wear, and stands up to scrubbing. It can be applied with brushes, rollers, or sprayers. The VOC emissions associated with each SKU after application are shown in Table. The test method used was the California Department of Public Health (CDPH) Standard method, a revised and expanded standard based on California Specification 01350..

1.5. Manufacturing

As shown in Figure 1, manufacturing begins with metering, followed by, pre-mix, dispersion, and let-down. The paint is then poured into, jars, cans, and pails, which are then labeled, boxed, and loaded on to pallet for distribution.

1.6. Packaging

Table 2 provides descriptions, volumes, and materials for the primary paint packaging used for Behr Premium Plus® Interior Paint. These packages are then placed in cardboard boxes and loaded onto heat-treated wooden pallets for distribution.

Table 7. Description of primary paint packaging.

CONTAINER	VOLUME	MATERIAL
Jar	Half-pint	High Density Polyethylene
Can	Quart or Gallon	Polypropylene
Pail	2 Gallons or 5 Gallons	High Density Polyethylene

1.7. Transportation

Raw materials and packaging are transported to each of the production facilities via truck or rail. After production and packaging, the paint is sent to one of twelve distribution centers by truck before being trucked to individual The Home Depot stores. Weighted average distances are calculated for transportation from distribution centers to stores in seven different regions.

Premium Plus® Interior Paint

According to ISO 14025,
ISO 21930

1.8. Product Installation and Use

Behr Premium Plus® Interior Paint can be applied using brushes, rollers, or sprayers. The use stage begins when the user applies the product to a substrate. This stage does not require any energy or additional cleaning inputs, but includes the VOCs emitted during application and drying. The Behr Premium Plus® Interior Paints are low-VOC paint products.

1.9. Reference Service Life and Estimated Building Service Life

Table 3 shows the design lifetime for interior and exterior paints of different quality. The entire Behr Premium Plus® Interior Paint line is considered high quality, and therefore has a design life of 15 years. Per the PCR, all results declared are calculated for a market life of 5 years. The estimated building life is 60 years per the PCR.

Table 8. Design lifetime of paints

COATING TYPE	LOW QUALITY	MID QUALITY	HIGH QUALITY	ALTERNATIVE
Interior Paint	3 years	7 years	15 years	N/A
Exterior Paint	5 years	10 years	20 years	Warranty

1.10. Reuse, Recycling, and Energy Recovery

The Home Depot stores encourage customers to use PaintCare or local paint recycling programs.

1.11. Disposal

Product end-of-life occurs with the disposal of the substrate material. 100% of the waste is disposed of in a landfill at the end-of-life stage and cannot be separated from the substrate before disposal. Packaging is recovered at a rate of 6.2% for plastics, 33.9% for metals, and 80.9% for paper and corrugated material. Recovery rates represent the average fractions of waste recovered in the US.

2. Life Cycle Assessment Background Information

2.1. Functional or Declared Unit

The functional unit for the study is:

Covering and protecting 1 m² of substrate for a period of 60 years (the assumed lifetime of a building), exhibiting 97% opacity after drying

The functional unit and reference flow required for the functional unit were calculated for both the market life and design life as prescribed by the PCR. Market life for interior paints is 5 years. The design life is based on the quality as determined by ASTM test methods for scrub resistance (ASTM D2486 - 06(2012)e1), burnish (ASTM D6736 - 08(2013)), and washability (ASTM D4828 - 94(2012)e1) and is shown in Table 2. Lifetimes and reference flows for each sheen and

2.2. System Boundary

The LCA was performed according to ISO 14040 standards. The system boundary is cradle-to-grave, and includes the following modules as defined in the PCR. The declaration covers the full range of Behr Premium Plus® Interior Paint sold in the North American market for the reference year 2021.

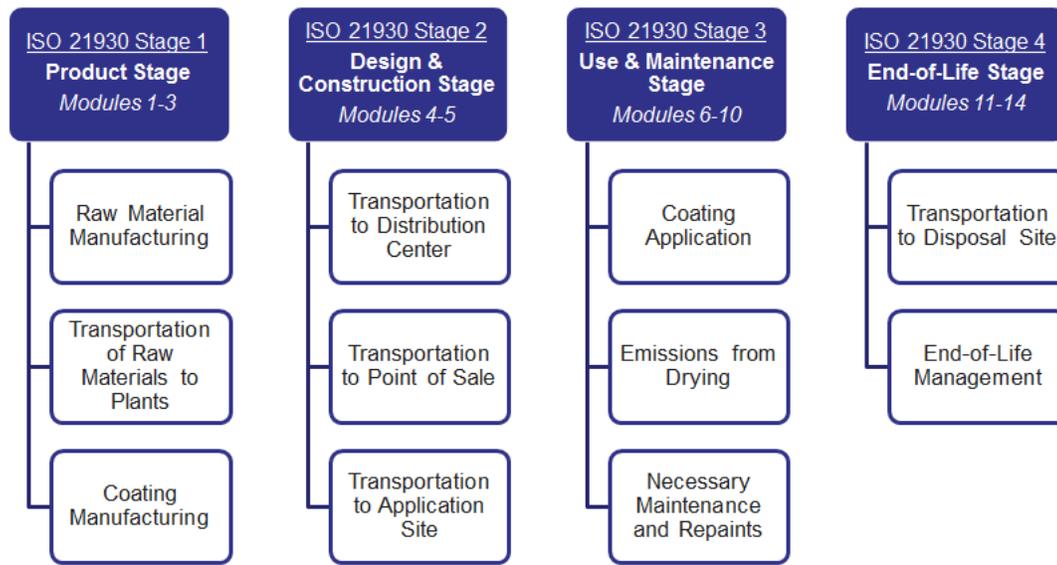

Figure 2. System boundaries for cradle to grave LCA

2.3. Estimates and Assumptions

The modeling approach makes assumptions that are prescribed by the PCR, such as in packaging disposal and recovery treatment, as well as transportation distances and use phase assumptions.

2.4. Cut-off Criteria

No cut-off criteria are defined by this study. For processes within the system boundary, all available energy and material flow data have been included in the model.

2.5. Data Sources and Quality

Primary data were obtained from Behr's six Behr Premium Plus® production facilities, one each in Chicago Heights, IL; Allentown, PA; Roanoke, TX; and Atlanta, GA; and two in Santa Ana, CA for the 2021 reference year. Background data were obtained from the GaBi 2023.1 database and are representative of the years 2012-2021. Overall, both primary and background data are representative of the product system and have been deemed very good quality.

2.6. Period under Review

The period under review is 2021.

2.7. Allocation

Manufacturing inputs for the six facilities were allocated to each paint product by volume.

Premium Plus® Interior Paint

According to ISO 14025,
ISO 21930

3. Life Cycle Assessment Results

In accordance with the PCR, TRACI 2.1 impact characterization methodology is used to calculate the declared environmental impacts, except for global warming potential and abiotic resource depletion, which follow the methodology in the IPCC 5th assessment report, and CML, respectively (Table 5). Additional inventory metrics are also calculated per the guiding PCR. The declared impacts and inventory metrics are summarized in this section. The total LCIA results for design life and market life for each impact category are provided in Table 10 and Table 17, respectively.

Furthermore, the results of each impact category for each stage are presented through Table 11 to Table 16 and from Table 18 to Table 23. Additionally, the LCI results for each stage are presented for each product (both market life and design life). Also, the total LCI results for each impact category are mentioned in this section.

3.1. Life Cycle Impact Assessment Results

4. LCA Interpretation

The LCA results for the manufacturing of Behr Premium Plus® Interior Paint products are dominated by the raw material specifically across all impact categories. The Deep bases (i.e., 1030A, 2300, 3300, 7300, and 8300) have the lowest impacts in every category for every sheen, and the White bases (i.e., 1050, 2050, 3050, 7050, and 8050) have the highest impacts because the Deep bases do not contain any TiO₂, and the White bases contain the most TiO₂.

While raw materials dominate most impact categories, SFP is unique in that the Use and Maintenance Stage (i.e., Stage 3) has a significant contribution. For the high gloss paints, Stage 3 contributes 72% to 80% of the SFP impacts leading their SFP to be 3 to 4 times greater than the paints with other sheens. This is due to the fact that the VOC emissions from the high gloss paints range from 115 to 144 g/L of paint, while the VOC emissions from the other sheens are <3.4 g/L of paint.

Additionally, end-of-life contributes 28% to 42% of the EP. The EP from end-of-life is primarily driven by NO_x emissions from the combustion of paper, plastic, and wood packaging.

Premium Plus® Interior Paint

According to ISO 14025,
ISO 21930

5. Additional Environmental Information

5.1. Environmental Activities and Certifications

GREENGUARD Certification

Behr Premium Plus® Interior products are GREENGUARD and GREENGUARD Gold Certified. This third-party certification assures our paints are low-emitting and contribute to healthy indoor environments.

GREENGUARD Certification establishes acceptable indoor air standards for indoor products, environments, and buildings. GREENGUARD Gold Certification offers stricter certification criteria, considers safety factors to account for sensitive individuals (such as children and the elderly), and ensures that a product is acceptable for use in environments such as schools and healthcare facilities.

GREENGUARD certified products are referenced standards in numerous sustainable building initiatives including Leadership in Energy and Environmental Design (LEED®), Collaborative for High Performance Schools (CHPS), Green Guide for Health Care (GGHC), Sustainable Building Industry Council (SBIC) and many others. For more information on the GREENGUARD Certification Program emission standards visit greenguard.org.

MPI Extreme Green Performance™ Standard (MPI GPS-2-12)

Behr Premium Plus® Interior paint are certified with the MPI Extreme Green Performance™ (X-Green) Standard, a three-pronged standard that has requirements on indoor air quality, durability, and environmental safety of paint products.

MPI's Green Performance™ Standards were established to challenge the thinking that VOC level alone should determine a 'green' coating. MPI believes that performance and durability are critical to true sustainability, since premature failure and the frequent repainting that results inevitably leads to greater VOC emissions and non-sustainable and costly maintenance operations. Therefore, paints certified to MPI's Green Performance™ Standard:

- 1) Provide performance and durability equal to their 'conventional' counterparts;
- 2) Have eliminated or contain only trace quantities of various undesirable chemical compounds such as phthalates;
- 3) Have reduced VOC. MPI's GPS 2 -- the most stringent in North America when introduced in 2007 -- has a maximum allowable VOC of 50 g/l across the board for all paint types.

The Extreme Green Environmental Performance™ Standard, which complements MPI's Green Performance™ Standards includes the following additional requirements:

- 1) No carcinogenic ingredients;
- 2) Maximum 50 g/l VOC;
- 3) Submit a third-party test result verifying they meet CHPS (Collaborative for High Performance Schools) emissions requirements;

Premium Plus® Interior Paint

According to ISO 14025,
ISO 21930

4) The certification of emissions compliance to CHPS must be within two years of testing.

The MPI Green Performance™ Standard is the only green paint/coatings certification required by both the US and Canadian governments and referenced by the South Coast Air Quality Management District (SCAQMD).
